CONTENTS.

PAPERS READ BEFORE THE CHEMICAL SOCIETY.

PAGE

I.—A New Method of Determining the Freezing Points of very Dilute Solutions. By PERCY BENEDICT LEWIS . . 1

II.—Corydaline. Part IV. By JAMES J. DOBBIE, M.A., D.Sc., and ALEXANDER LAUDER 17

III.—The Alkaloïds of *Corydalis cava*—Corybulbine. By JAMES J. DOBBIE, M.A., D.Sc., and ALEXANDER LAUDER . . . 25

IV.—The Yellow Colouring Matter of *Sophora japonica*. By EDWARD SCHUNCK, Ph.D., F.R.S. 30

V.—Interaction of 1 : 2-Diketones with Primary Amines of the General Formula, $R'\cdot CH_2\cdot NH_2$. By FRANCIS R. JAPP, F.R.S., and W. B. DAVIDSON, M.A., B.Sc. 32

VI.—A New Method of obtaining Dihydroxytartaric acid, and the Use of this Acid as a Reagent for Sodium. By H. J. H. FENTON, M.A. 48

VII.—Isomeric Dinitrodiazoamidobenzenes and their Melting Points. By R. MELDOLA, F.R.S., and F. W. STREATFEILD, F.I.C. 50

VIII.—Essential Oil of Hops. By ALFRED C. CHAPMAN. . 54

IX.—Solution and Pseudo-Solution. Part II. Some Physical Properties of Arsenious Sulphide and other Solutions. By S. E. LINDER and HAROLD PICTON 63

X.—Contributions to the Chemistry of Cellulose. I. Cellulose-sulphuric acid, and the Products of its Hydrolysis. By A. L. STERN, D.Sc., Lond., Associate of the Mason College . 74

XI.—Note on the Interaction of Bismuth Haloïd Compounds and Hydrogen Sulphide. By M. M. PATTISON MUIR, M.A., and EDWIN M. EAGLES, B.A., St. John's College, Cambridge 90

XII.—The Constituents of *Piper ovatum*. By WYNDHAM R. DUNSTAN, M.A., F.R.S., and HENRY GARNETT 94

XIII.—Note on the Active Constituent of the Pellitory of Medicine. By WYNDHAM R. DUNSTAN, M.A., F.R.S., and HENRY GARNETT 100

PAGE

XIV.—Action of certain Acidic Oxides on Salts of Hydroxy-acids. Part I. Metallic Tartrarsenites. By G. G. Henderson, D.Sc., M.A., Professor of Chemistry in the Glasgow and West of Scotland Technical College, and A. R. Ewing, Ph.D. 102

XV.—The Condensation of Ethylic Trimethylenedicarboxylate with Ethylic Malonate. By W. A. Bone, Ph.D., and W. H. Perkin, jun. 108

XVI.—*cis*- and *trans*-Hexahydro-orthotoluic acids. By W. Goodwin and W. H. Perkin, jun. 119

XVII.—A New Form of Barometer. By J. Norman Collie, Ph.D. 128

XVIII.—Condensation of Benzile with Ethylic Malonate. By Francis R. Japp, F.R.S., and W. B. Davidson, M.A., B.Sc. 132

XIX.—Stereoisomeric $\alpha\alpha'$-Dimethylpimelic acids. By F. Stanley Kipping, Ph.D., D.Sc. 139

XX.—Preparation of Adipic acid and some of its Derivatives. By Walter H. Ince, Ph.D., Demonstrator of Chemistry at St. Thomas's Hospital 155

XXI.—On the Determination of High Temperatures by means of Platinum-Resistance Pyrometers. By C. T. Heycock and F. H. Neville 160

XXII.—Action of Potassium Cyanide Solutions on Gold and Silver. By J. S. Maclaurin, B.Sc., University College, Auckland, New Zealand 199

XXIII.—Octacetylmaltose. By Arthur R. Ling and Julian L. Baker 212

XXIV.—Action of Heat on Ethylic β-Amidocrotonate. Part II. By J. Norman Collie, Ph.D., F.R.S.E. 215

XXV.—The Acid Sulphate of Hydroxylamine. By Edward Divers, M.D., F.R.S., Imperial University, Japan . . 226

XXVI.—Mercury and Bismuth Hypophosphites. By Seihachi Hada, Graduate of the Imperial University, Tokyo, Japan. 227

XXVII.—Kamala. Part II. By A. G. Perkin, F.R.S.E. . 230

XXVIII.—Remarkable Molecular Change in a Silver Amalgam. By Fannie T. Littleton 239

XXIX.—Chemical Composition of two Silver Ornaments from Inca Graves at Chimbote, Peru. By Cora Walker . . 242

XXX.—Derivatives of Ethylorthotoluidine. By William MacCallum, jun. 246

XXXI.—Acidimetry of Hydrogen Fluoride. By Tamemasa Haga and Yūkichi Ōsaka 251

XXXII.—The Magnetic Rotation of some Unsaturated Hydrocarbons. By W. H. Perkin, Ph.D., F.R.S. 255

PAGE

XXXIII.—$\beta\beta$-Methylethylpropionic acid, $\begin{matrix}CH_3\\C_2H_5\end{matrix}\!\!>\!CH\cdot CH_2\cdot COOH$. By W. H. Bentley, B.Sc. 264

XXXIV.—Volumetric Estimation of Manganese. By Joseph Reddrop and Hugh Ramage 268

XXXV.—The Sulphides and Polysulphides of Ammonium. By W. P. Bloxam, B.Sc. (Lond.), Royal Naval College, Greenwich 277

XXXVI.—Note on the Action of Diastase on Cold Starch-paste. By Horace T. Brown, F.R.S., and G. Harris Morris, Ph.D., F.I.C. 309

XXXVII.—Titration of Iodine Solutions with Barium Thiosulphate. By R. T. Plimpton, Ph.D., and J. C. Chorley . 314

XXXVIII.—On Latent Heat of Fusion. By Holland Crompton 315

XXXIX.—The Melting Points of Mixtures. By Holland Crompton and Miss M. A. Whiteley 327

XL.—Electrolysis of Potassium Allo-ethylic Camphorate. By James Walker, D.S., Ph.D., Professor of Chemistry in University College, Dundee, and James Henderson, B.Sc., and "Camphothetic" acid, a correction by J. W. . . 337

XLI.—Dimethylketohexamethylene. By F. Stanley Kipping, Ph.D., D.Sc. 349

XLII.—Sulphonic Derivatives of Camphor. Part II. By F. Stanley Kipping, Ph.D., D.Sc., and W. J. Pope. . . 354

XLIII.—π-Halogen Derivatives of Camphor. By F. Stanley Kipping, Ph.D., D.Sc., and W. J. Pope 371

XLIV.—Some Oxypyridine Derivatives. By Miss A. P. Sedgwick and N. Collie, F.R.S.E. 399

XLV.—The Colouring Principle of *Toddalia aculeata* and *Evodia meliæfolia*. By A. G. Perkin and J. J. Hummel . 413

XLVI.—Trimethylsuccinic and $\alpha\alpha$-Dimethylglutaric acids. By Wm. A. Bone, M.Sc., Ph.D. (late Fellow of Victoria University) and W. H. Perkin, jun., Ph.D., F.R.S. . . 416

XLVII.—Contributions to the Chemistry of Cellulose. By C. F. Cross, E. J. Bevan, and C. Beadle 433

XLVIII.—Potassium Nitrososulphates. By Edward Divers, M.D., F.R.S., and T. Haga 452

XLIX.—Contributions to our Knowledge of the Aconite Alkaloïds. Part XI. The Constitution of Aconitine. Acetyl Derivatives of Benzaconine and Aconitine. By Wyndham R. Dunstan, M.A., F.R.S., and Francis H. Carr, Salters Company's Research Fellow in the Research Laboratory of the Pharmaceutical Society 459

PAGE

L.—Marignac Memorial Lecture.—The Life Work of Marignac. By P. T. Cleve, Professor of Chemistry in the University of Upsala 468

LI.—Action of Nitrosyl Chloride on Amides. By William A. Tilden, D.Sc., F.R.S., and Martin O. Forster, Ph.D. . 489

LII.—Action of Nitrosyl Chloride on Asparagine and Aspartic acid. Formation of Lævorotatory Chlorosuccinic acid. By William A. Tilden, D.Sc., F.R.S., and B. M. C. Marshall, A.R.C.S. 494

LIII.—A Constituent of Persian Berries. By A. G. Perkin, F.R.S.E., and J. Geldard 496

LIV.—Paraheptotoluene and its Derivatives. By F. Stanley Kipping, Ph.D., D.Sc., and O. F. Russell 502

LV.—Methylisobutylacetic acid, $CH(CH_3)_2 \cdot CH_2 \cdot CH(CH_3) \cdot COOH$. By M. W. Burrows, B.Sc., and W. H. Bentley, B.Sc. . 509

LVI.—Note on the Formation of Platinic Pyrophosphate. By Robert E. Barnett, A.R.C.S. 513

LVII.—Action of Hydrogen Sulphide on Antimonic Acid Solutions. By Otto Bošek, Ph.D. 515

LVIII.—Action of Hydrogen Sulphide on Solutions of Antimonic, Arsenic, and Telluric acids. By Bohuslav Brauner, Ph.D., Professor in the Bohemian University, Prague, late Berkeley Fellow of Owens College 527

LIX.—On the Atomic Weight of Tellurium. By Bohuslav Brauner, Ph.D., Professor 549

LX.—Note on Liquation in Crystalline Standard Gold. By Tom Kirke Rose, D.Sc., A.R.S.M., Assistant Assayer of the Royal Mint 552

LXI.—Substitution-derivatives of Urea and Thiourea. By Augustus E. Dixon, M.D. 556

LXII.—Derivatives of Succinyl and Phthalyl Dithiocarbimides. By Augustus E. Dixon, M.D., and Robert Elliot Doran 565

LXIII.—Affinity of Weak Bases. By James Walker, D.Sc., and Emily Aston, B.Sc. 576

LXIV.—Diortho-substituted Benzoic Acids. I. Substituted Benzoyl Chlorides. By J. Joseph Sudborough 587

LXV.—Diortho-substituted Benzoic Acids. II. Hydrolysis of Aromatic Nitriles and Acid-amides. By J. Joseph Sudborough 601

LXVI.—Note on the Action of Sodium Ethoxide on Deoxybenzoïn. By J. Joseph Sudborough 604

LXVII.—Stereoisomeric Osazones. Part I. By Harry Ingle, Ph.D., B.Sc., and Harold H. Mann, B.Sc. 606

PAGE

LXVIII.—Preparation of the Active Lactic Acids and the Rotation of their Metallic Salts in Solution. By THOMAS PURDIE, Ph.D., B.Sc., and J. WALLACE WALKER, M.A. . 616

LXIX.—The Interaction of Sulphur and α-Nitronaphthalene. By ARMAND HERZFELDER, Ph.D. 640

LXX.—Acid Compounds of some Natural Yellow Colouring Matters. By ARTHUR G. PERKIN, F.R.S.E., and L. PATE . 644

LXXI.—ββ-Dinaphthyl and its Quinones. By FREDERICK D. CHATTAWAY, B.A., Christ Church, Oxford 653

LXXII.—A Comparison of some Properties of Acetic acid and its Chloro- and Bromo-derivatives. By SPENCER UMFREVILLE PICKERING, F.R.S. 664

LXXIII.—Helium, a Constituent of Certain Minerals. By WILLIAM RAMSAY, F.R.S., J. NORMAN COLLIE, Ph.D., and MORRIS W. TRAVERS, B.Sc. 684

LXXIV.—Action of Diastase on Starch. Preliminary Notice. By ARTHUR R. LING and JULIAN L. BAKER 702

LXXV.—On the "Isomaltose" of C. J. Lintner. By HORACE T. BROWN, F.R.S., and G. HARRIS MORRIS, Ph.D. . . 709

LXXVI.—Action of Diastase on Starch. Second Notice. By ARTHUR R. LING and JULIAN L. BAKER 739

LXXVII.—Transformation of Ammonium Cyanate into Urea. By JAMES WALKER, D.Sc., Ph.D., and FRED J. HAMBLY, F.I.C., University College, Dundee 746

LXXVIII.—Ethereal Salts of Ethanetetracarboxylic acid. By JAMES WALKER, Ph.D., D.Sc., and J. R. APPLEYARD, University College, Dundee 768

LXXIX.—New Formation of Glycollic Aldehyde. By HENRY J. HORSTMAN FENTON, M.A. 774

LXXX.—Some Derivatives of Humulene. By ALFRED C. CHAPMAN, F.I.C. 780

LXXXI.—A Colouring Matter from *Lomatia ilicifolia* and *Lomatia longifolia*. By EDWARD H. RENNIE, M.A., D.Sc., Professor of Chemistry in the University of Adelaide, South Australia 784

LXXXII.—Dissociation of Liquid Nitrogen Peroxide. Part II. The Influence of the Solvent. By JAMES TUDOR CUNDALL, Lecturer on Chemistry in the Edinburgh Academy . . 794

LXXXIII.—Kjeldahl's Method for the Determination of Nitrogen. By BERNARD DYER, D.Sc. 811

LXXXIV.—The Colouring and other Principles contained in Chay Root. Part II. By A. G. PERKIN and J. J. HUMMEL 817

LXXXV.—A Modification of Zincke's Reaction. By HENRY R. HIRST and JULIUS B. COHEN, Ph.D., Yorkshire College . 826

PAGE

LXXXVI.—A Method for Preparing the Formyl Derivatives of the Aromatic Amines. By HENRY R. HIRST and JULIUS B. COHEN, Ph.D., Yorkshire College 829

LXXXVII.—The Molecular Refraction of Dissolved Salts and Acids. By Dr. JOHN HALL GLADSTONE, F.R.S., and WALTER HIBBERT, F.I.C. 831

LXXXVIII.—Rate of Escape of certain Gases from Solutions of varying Concentration. By EDGAR PHILIP PERMAN, D.Sc. 868

LXXXIX.—The Dissociation of Chloride of Gold. By T. K. ROSE, D.Sc., A.R.S.M. 881

XC.—Some Physical Properties of the Chlorides of Gold. By T. K. ROSE, D.Sc., A.R.S.M. 905

XCI.—Homonucleal Tri-derivatives of Naphthalene. By RAPHAEL MELDOLA, F.R.S., and FREDERICK WILLIAM STREATFEILD, F.I.C. 907

XCII.—The Ethereal Salts of the Optically Active Lactic, Chloropropionic and Bromopropionic Acids. By J. WALLACE WALKER, M.A., Exhibition Science Scholar, St. Andrew's University. 914

XCIII.—Some New Azo-compounds. By CHARLES MILLS, Assoc. C.G.L.I. 925

XCIV.—Some Derivatives of Maclurin. By CHARLES SAMUEL BEDFORD and ARTHUR GEORGE PERKIN, F.R.S.E. . . 933

XCV.—The Constituents of *Artocarpus integrifolia*. Part I. By ARTHUR GEORGE PERKIN, F.R.S.E., and FRANK COPE . 937

XCVI.—Optically Active Methoxy- and Propoxy-succinic Acids. By THOMAS PURDIE, F.R.S., and HERBERT WILLIAM BOLAM, B.Sc. 944

XCVII.—Ethereal Salts of Active Methoxy- and Ethoxy-succinic Acids. By THOMAS PURDIE, F.R.S., and SYDNEY WILLIAMSON, Ph.D. 957

XCVIII.—Rate of Escape of certain Gases from Solutions of varying Concentration. Addendum. By EDGAR PHILIP PERMAN 983

XCIX.—Note on the Reduction of Potassium Platinochloride. By EDWARD SONSTADT 984

C.—Orthobenzoicsulphinide. By WILLIAM POPE . . . 985

CI.—Derivatives of β-Resorcylic acid. By A. G. PERKIN, F.R.S.E. 990

CII.—Note on the Gravimetric Estimation of Maltose by Fehling's Solution. By T. A. GLENDINNING, F.I.C. . . 999

CIII.—Studies in the Malonic Acid Series. By S. RUHEMANN, Ph.D., M.A., and K. J. P. ORTON, B.A., Hutchinson Student of St. John's College, Cambridge 1002

PAGE

CIV.—Mercury Perchlorates. By Masumi Chikashigé, B.Sc. . 1013

CV.—α-Ethylene-Dihydroxylamine Dihydrobromide. By C. M. Luxmoore, D.Sc. 1018

CVI.—Alleged Isomerism of Potassium Nitrososulphate. By C. M. Luxmoore, D.Sc. 1019

CVII.—On the Freezing Points of Gold and Silver. By C. T. Heycock and F. H. Neville 1024

CVIII.—The Action of certain Acidic Oxides on Salts of Hydroxy Acids. Part II. By George G. Henderson, D.Sc., M.A., and David Prentice 1030

CIX.—Acidylthiocarbimides. By Augustus E. Dixon, M.D. . 1040

CX.—On Flame Temperatures and the Acetylene Theory of Luminous Hydrocarbon Flames. By Arthur Smithells, B.Sc. 1049

CXI.—Synthesis of Diphenyloxytriazole. By George Young, Ph.D., Firth College, Sheffield 1063

CXII.—The Vapour Pressures, Specific Volumes, and Critical Constants of Normal Hexane. By G. L. Thomas, B.Sc., and Sydney Young, D.Sc., F.R.S., University College, Bristol 1071

CXIII.—Some Constituents of the Root of *Polygonum cuspidatum*. By A. G. Perkin, F.R.S.E. 1084

CXIV.—A New Series of Hydrazines. By Frederick D. Chattaway, B.A., and Harry Ingle, B.Sc. 1090

CXV.—Sodium Nitrososulphate. By Edward Divers, M.D., F.R.S., and Tamemasa Haga, D.Sc., F.C.S. 1095

CXVI.—The Constitution of the Nitrososulphates. By Edward Divers, M.D., F.R.S., and Tamemasa Haga, D.Sc., F.C.S. . 1098

Annual General Meeting 1105
